## Home bubbles

**TECHNOLOGY** - Love bottled bubbly water, but feel guilty about not just drinking tap water? (All that plastic, all those empty bottles.)

You may want to buy a SodaStream home soda-maker.

Each drink-maker costs \$149 to \$299, and comes with two reusable bottles and a carbon dioxide cylinder that makes up to 60 litres of carbonated beverages (that's apparently the equivalent of 180 cans of pop). For a list of retailers, more information or to buy online, go to [sodastream.ca](http://sodastream.ca).
